

The Daily Gazetteer.

NUMB. 2316

WEDNESDAY, NOVEMBER 17. 1742.

Yesterday arriv'd a Mail from France.

Madrid, Oct. 29.

De Montemar having written from Genoa to M. de Campillo in order to know what Resolution the Court had taken as to his Affair, that Minister has written to him to inform his Excellency, that as things stand at present it would be more prudent for him to remain where he is than to think of

returning into Spain. Besides the 10,000 Men which march'd in the Beginning of this Month from Barcelona, to reinforce the Army of Don Philip, the two finest Regiments of Dragoons in the Kingdom, viz those of France and Batavia, have Orders to pursue the same Rout. Instructions have been likewise sent into Switzerland, to endeavour to raise ten Regiments there of 1000 Men each, to be compleat by February next; so that the Court seems more intent on carrying on the War with Vigour than ever.

Florence, Nov. 3. The Count de Gages, General of the Spanish Army in Italy, has written a very polite Letter to our Regency, desiring Winter Quarters for 8000 Men, but the Regency have civilly refused him. We hear however that a Body of those Troops are actually advancing towards our Frontiers, which gives our Government infinite Disquiet.

Moscow, Oct. 18. Yesterday Dr. Smith, Physician to the Guards, set out for the Castle of Jerisloff (about 300 Werst from this City) by Order of her Czarish Majesty, to attend the late Duke of Courland and his Consort, who are both ill there.

Vienna, Nov. 7. By the last Accounts we had, the Gr. Duke was at Retz, and the French at Napsberg. The latter are supposed to be intending to gain Kelheim, Ingolstadt, and Donawerth, by passing the Danube at Thurnardorf below Ratisbon. Prince Lobkowitz's last Letters were from Rakonitz, and it is thought he will by this time have summon'd Prague, from whence M. de Broglie is retired to take the Command of the Army in Bavaria. There is Advice, that Feldt Marshal Seckendorff has an advanced Post at Rieden, and is marching himself to Althain towards General Berenclau at Scherding. The latter has at the worst his Retreat sure to Passau, and it is not doubted but the former must in a few Days be glad to gain the Leek, by so great a Detour as that of Munich. He had already publish'd his Patents for raising Contributions upon Upper Austria. Count Harrach, who has been some time ill, now lies at the Point of Death; his Decease will make a Vacancy in the Conference.

Habersbourg, Nov. 18. By the last Letters from Bavaria it is assured, that a bare Continuation of the War, without giving Battle, will go near to ruin the French Army in that Country. That since Maillebois's Retreat from Egra, his Force, thro' Sickness, Death, and Desertion, actually suffers a Diminution of 9000 Men; he detached M. Bulincourt with 3000 Men over the Danube, near Thonauhoff, to succour Seckendorff, but that Detachment is return'd, and the Junction between the Imperialists and French was thought impracticable. Broglie arrived at their Camp the 13th, and the same Day they marched towards the Austrians, who nevertheless think of soon going into the same Winter Quarters they had last Year. From Bohemia we hear, that General St. Ignon has taken Melnick, and blockaded Leuthmeritz; and that Pr. Lobkowitz is endeavouring to environ Prague. If Leuthmeritz is taken, the Austrians will have a free Passage on the Elbe, and cut off all the Communication the French had with Egra and Saxony. The Hussars had brought in Prisoners 200 French who were left on the Beraun. M. Ammond, who was his Prussian Majesty's Resident at this Court, is recalled, and is to go to Vienna.

Nays, Nov. 21. By an Express which pass'd this Evening through this Place for England we learn, that the Imperial Court had received certain Intelligence that ten thousand Men, viz. 15 Battalions and a proportionable Number of Squadrons, were detach'd from the French Army on the 13th, in order to join M. Seckendorff; that on the 16th the Junction was made, and that the Marshal having received the same Day all his heavy Artillery from Ingolstadt, had resolv'd without Loss of Time to summon Passau, which being a Place very indifferently fortified, he supposed would not make any great Resistance; and having taken this Place, he propos'd to block up the Castle, and to march immediately with all his Forces to take Winter Quarters in Upper Austria. The same Letters assert, that the Marshal had already rais'd vast Con-

tributions in that Country, and in particular on one Abbey in Austria 40,000 Florins. It is farther said, that Count Maurice of Saxony had canton'd a very considerable Body of Troops in the Neighbourhood of Ratisbon, and had begun to fortify his Camp with great Diligence.

As this extraordinary News is of fresher Date than any we have by any other Canal from Germany, we could not but give it a Place, tho' certainly, all Circumstances considered, it is not a little improbable.

Extract from the Paris Almanin.

The third Memoir which M. de Reaumer read on the 13th of this Month at the Royal Academy of Sciences, related to a very curious Discovery that has been made at the Hague by the Sieur Tremblay. It is, that a certain Aquatick Insect, called a Polype, hath this singular Property, that being cut into several Pieces, each Piece in the Space of 24 Hours re-produces what is sufficient to make it a perfect Animal; so that this Insect being cut crosswise in three Pieces, the Head produces a Tail, the Tail produces a Head, and the Middle produces both Head and Tail. This Experiment has been carried much farther; for the Insect having been cut into 40 Pieces, every one of these produced a perfect Animal, so that 40 Polypes were produced out of one. The same Insect being cut longways, each Moiety produced a complete Body. Mr. de Reaumer having made several very judicious Observations upon this strange Discovery, and having observ'd that Nature is never singular in her Productions, he from thence began to suspect that some other Insect might also be endowed with this Property; and making several Experiments in consequence of this Notion, he at length found a certain Kind of Earth-Worms, which have the same Capacity of re-producing themselves, tho' in a much longer Space than 24 Hours.

Letters from Madrid of the 6th of this Month inform us, that the Infant Don Philip is in perfect Health, and that he had Thoughts of acting offensively against the King of Sardinia. The same Letters add, that there was certain Advice from Lisbon, of the King of Portugal's being much better; inasmuch that there were great Hopes of his perfect Recovery. We are inform'd that the Grand Duke of Tuscany is within Three Leagues of our Army, and that M. Broglie had not re-joined that of M. Belleisle; but this merits Confirmation.

Actions 2140.

HOME PORTS.

Deal, Nov. 15. Wind N. E. and blows hard. Remain the Men of War as per last.

Arrived

At Maryland, the Planter, Latham, from Africa.

At Lisbon, the Jolliffe's Adventure, Archer, from Newfoundland.

At Edinburgh, the Industry, Lamport, from Barbados.

At Padstow, the Expedition, Ellworthy, from St. Christopher's.

L O N D O N.

Baron Alderfeld has been deputed by the Senate of Sweden to carry to his Royal Highness the Duke of Holstein the News of his being elected Successor to the Crown, and to desire to know whether his Highness intended to accept of that Succession.

Letters from Hamburg inform us, that her Imperial Majesty of Russia had caus'd his Royal Highness the Duke of Holstein to be proclaim'd with much Solemnity, Grand Duke of Finland.

Private Letters from Modena tell us, that a Sergeant with a Party of 30 Miquelets, which had deserted to the Austrians, advanced into the Heart of the Spanish Quarters, and meeting with a Courier going to the Camp, the Sergeant told him he was sent by Count Gages to escort him to the Spanish Camp he conducted him to Count Traun. In his Portmanteau there were found Papers of the utmost Consequence, and 26,000 Sequins in Gold.

Private Letters from Ratisbon dated the 12th Instant N. S. say, that M. Maillebois set out that Morning on his Return to France.

Private Letters from Paris by the last Mail say, that M. de Mæle is actually set out for Vienna, in order to make some Proposals for an Accommodation, and that in case they meet with a favourable Reception M. d'Argenson will go thither in a publick Character, in order to put the last Hand to the Treaty.

Private Letters from France say, that the present Vintage is much superior to any they have had for Seven Years past.

The Duke of Aremberg and General Chanclos landed safely at Ostend from on board the Packet-boat on the 8th Instant, and immediately set out together for Brussels.

Yesterday his Majesty went with the usual State to the House of Peers, and open'd the Sessions of Parliament with a most Gracious Speech from the Throne to both Houses.

The Antigua Packet, Oliver, from Barbados, is ashore at the Isle of Man.

Extract of a Letter from Jamaica, dated Sept. 5.

We have no fresher Advice of Commodore Anson, than what I sent you by the Louisa Man of War; excepting that by a Sloop arriv'd a few Days ago from Porto Bello, we have a Confirmation of his having left the Coast of Panama, where it was universally believ'd that he was sail'd to the Northward, in order to stretch over to the East Indies. Our Golden Harvest seems to be almost at an End; the last Ships from the Coast bringing but little Plate, and should the Peace with Spain take place, which by your last I find is much talk'd of, we must bid Adieu to our Trade with them, at least for the present. Since my last there have been several Prizes brought in here by the Men of War and Privateers, and some of them very valuable ones. In particular, a French Ship bound from the Havana to Cadiz, on board of which were Two Friars, who had been near Thirty Years in these Parts, and had amass'd together a very large Sum of Money, with which they were returning to Old Spain, to end their Days.

Prostant Venales apud J. & P. Knapton & Car. Barchart Londini, W. Thurlbourn Cantabrigiae, & Jacobum Fletcher Oxoniae.

Where Subscribers may have their Books, sending their Receipts and the Second Payment.

This Day is Publish'd,
Beautifully printed in Four Volumes, Octavo, corrected by
the Author,

The SECOND EDITION of
THE Works of TACITUS, translated
into English. To which are prefixed several large
Discourses upon Julius Cæsar, Augustus, and their Successors,
and their Arts of Government; upon Governments, Free and
Arbitrary; upon Courts, Armies, and Conquests; upon
Princes, Ministers, Nobility, and People; upon publick Frugi-
tality; upon Teaching and Teachers; upon the State of the
Romans under the Emperors, the Debauchment, and Misery of
that great People, its Causes, &c.

By **THOMAS GORDON, Esq.**
Printed for J. Osborn, at the Golden Ball in Pater-noster-
Row. Where may be had, just published,

I. **THE INDEPENDENT WHIG; or, A Defence of Primitive
Christianity**, and of our Ecclesiastical Establishment, against
the exorbitant Claims of Fanatical and Dissaffected Clergymen.
The Sixth Edition, with Additions and Amendments. In
Three Volumes. The Third Volume may be had alone, to
complete Gentlemen's Sets.

II. **Cato's Letters; or, Essays on Liberty, Civil and Reli-
gious, and other important Subjects.** The Fourth Edition,
in 4 Vols. 12mo.

To-morrow will be Publish'd,

(Price, One Shilling)

Number XXXIX. containing Five Sheets,
(The same Number of Sheets to be continued publishing
every Week till the Whole is completed) of

A MEDICINAL DICTIONARY:
Designed as a Body of Physick and Surgery, both with
Regard to Theory and Practice. Compiled from the best Wri-
ters Ancient and Modern, with useful Observations. Illus-
trated with Copper-Plates.

By **R. JAMES, M.D.**

N.B. In this Work will be contained all the Medicinal,
Chymical, and Anatomical Treatises dispersed in the Memoirs
of the Academy of Sciences, and large Commentaries upon
the Physiological, Therapeutical, Chymical, and Chirurgical
Works of BOERHAAVE, particularly upon his *cephalitis*; where his
Method of Cure will be compar'd with that of HIL-
DEBRANDT, particularly with Respect to *Acute Dissemper*.

Printed for the Society of Bookellers for Promoting of
Learning; and sold by T. Osborn in Gray's-Inn; and J. Cro-
katt, at the Black Horse near Fleet-bridge in Fleet-street.

Of whom may be had,

Proposals for Printing the above, with an Account of the
Work annex'd.

As likewise, Price 1 s.

Dr. JAMES's New Method of Preventing and Curing the
Madness caused by the Bite of a Mad Dog, laid before the
Royal Society in February last.

N.B. These Persons who have not yet taken in the MEDICINAL
DICTIONARY, may begin with Number 1. and go on progres-
sively, as often as they please. Such as will give Directions to
J. Crockatt, the Publisher, shall have it sent them to their
Place of Abode.

This Day is published,

**A Catalogue of a LIBRARY of Curious
and Well-chosen BOOKS**, Collected at a great Ex-
pence by an Ingenious Gentleman in Suffolk, many of them
Royal Paper, Bound in Turkey Leather, and other elegant
Bindings: Consisting of Divinity, Antiquities, History, Voy-
ages and Travels, Mathematics, Law, Poetry, Plays, &c.
and all Sorts of Police Literature; and many Curious Books
in Hebrew, Greek, and Latin.

To which are added,

The LIBRARY of the late Rev. Mr. W. JACOBS, of Mar-
den in Kent.

Among which are,

In FOLIO
Grævius's Antiquities of Italy, &c.
45 vol. L. P.
Poli Synopses and Annotations
Constantini Lexicon.
Tillot's and Barrow's Works
The Statutes at large, 5 vol.
Somner's Saxon Dictionary.
Views of Noblemen's Seats
and Cathedrals.
Wells's Maps, and Gordon's
Tasitius.
Bacon's Works, 4 vol.
Rycant's Hist. Turke, 3 vol.
Dugdale's Warwickshire, 2 v.
—Monasticon, 3 vol.
—Baronage, 3 vol.
—Draining of the Fens.
Harris's Voyages, 2 vol.
Stow's Survey by Strype, 2 v.
Spelman & Dugdale's Glossary.
Rushworth's Collections, 8 v.
Hickes's Thesaurus, 3 vol.
Madon's Hist. of Essex, &c.

In QUARTO
Mariana's Hist. of Spain.

Mueschenbroek Physicæ.
Philos. Transact. abridg'd, 7 v.
Palmer's Hist. of Printing.
In OCTAVO, &c.
T. Cic. Op. 11 T. per Grav.
—per Davilum, 6 Tom.
Wells's Xenophon, 3 vol.
Tacitus, Seneca, & Ovid. Va-
riorum.

Which will begin to be Sold by AUCTION, at North's
Coffee-house, in King Street, Cheap-side, on Wednesday the
24th of this Instant November, at Five of the Clock, and to
continue every Evening (Monday excepted) till all are sold.

By **JOHN OSWALD, Book-seller, as the Rose and Crown
in the Poultry, where Catalogues may be had.**

Catalogues are likewise given away at Mr. Buckland's at the
Buck in Pater-noster Row, Mr. Woodward's near Temple-
Bar, Mr. Stagg's in Westminster-Hall, Book-sellers; and at the
following Coffee-houses, Foret's, Charing-Cross; George's,
without Temple Bar; Batson's, Hamlin's, and Amsterdam;
at the Royal Exchange, and at the Place of Sale.

N.B. The Books may be viewed Three Days before the Sale.

This Day is published,
(Price Five Shillings.)

THE Elements of ALGEBRA, in a
New and Easy Method, with their Use and Applica-
tion, in the Solution of a great Variety of Arithmetical and
Geometrical Questions, by General and Universal Rules.
To which is prefix'd, An Introduction containing a suc-
cinct History of this Science.

By **Mr. NATHANIEL HAMMOND, of the Bank.**

Extract from the Account of this Book in the Works of the
Learned.

'The World has long complained of the Want of a proper
Introduction to Algebra. Some are so very concise, as if
they were contrived not to teach but introduce a Teacher;
others again are larger, but wrote with so little Condescen-
sion to the Understandings of such as are altogether unac-
quainted with the Science, that they are of very little Use
to those who are most inclined to make use of them. Whence
it comes to pass, that few find it practicable to make any
Progress in Algebra without a Master, tho' certainly the Sci-
ence in itself is far from surpassing a clear Head, and a toler-
able Understanding.

'The Design of this Treatise, which is of a reasonable Bulk,
and which contains nothing which is not solid, and to the
Purpose, is to assist such as are engaged in teaching Algebra
with a regular Method, and a large Stock of Examples; so
that their Scholars may find Employment in their Absence;
and to enable such as live in Country-Places, and must con-
sequently want all other Tutors, except Books, to acquire
such a Skill in this Science, as may enable them to spend a
Portion of their Time agreeably in the Cultivation of their
better Parts, and in rendering a natural Method of enquir-
ing after Truth habitual.

'The Treatise begins with a copious Explanation of the
Fundamental Principles of the Art, and of the Signs and
Method of Notation used therein. The Author then pro-
ceeds to the several Rules, explaining them carefully and
copiously in all their various Cases; so that with a moderate
Attention it is simply impossible for a Person, who desires to
be Master of Algebra, to miss of his End.

'We never find this Writer advancing any thing out of its
proper Place, or burthening the Mind of his Scholar with
Rules, before they become necessary: He professes to have
imitated the judicious Euclid in this Respect; and he has
done it with equal Art and Felicity. By this means he has
delivered the young Student in Algebra from that which is
usually the most fatiguing Part of the Science, viz. The
Doctrine of Surds, in the Manner in which it is usually
taught. By the same Means he leads his Reader directly to
Equations; and, by shewing him the Profit he is to reap
from this Science, encourages him to overcome all its Diffi-
culties. But having thus laid a strong and rational Founda-
tion, he moves more slowly through the rest of his Work,
that whoever follows him, may be obliged to become Master
of ever Branch of the Art, so as to be a complete Algebraist,
before he quits his Book, and not a Smatterer.

'Quadratic Equations, and the Art of managing Conver-
ging Series, the admirable Invention of the incomparable
Newton, are here so clearly explained, and their several Cafes
so plainly set down, and so thoroughly explicated, that it
may be truly said, there are no where else such Instructions
to be met with. At the Close of the Book, we find abun-
dant Observations, necessary for enlightening such Minds
as are willing to proceed still farther in analytic Discoveries;
so that considering the Compass of this Work, and that too
is very moderate, it is as complete as possibly can be expect-
ed: And he who is thoroughly versed in it, will find no great
Difficulties, when he proceeds to sublimer Studies. The
Language is plain and natural, the Book is more copious
than any other in Examples, and the Illustrations of them
are so full and clear, that it is impossible to mistake their
Meaning.

Printed for J. Walthoe, over-against the Royal Exchange
in Cornhill.

Of whom may be had,

1. **JUS PARLIAMENTARIUM: Or, The Ancient Power,
Jurisdiction, Rights and Liberties of the most High Court of
Parliament.** By **WILLIAM PETTY, Esq.** late of the Inner
Temple, and Keeper of the Records in the Tower.

2. **The LIFE of SETHOS.** Written by M. Teraffon, one
of the Members of the French Academy, as also of the Royal
Academy of Sciences at Paris. Translated from the French by
THOMAS LEDIARD, Esq.

By Order of the Lord Keeper of the Seals, I have read a
Manuscript, intitled, The Life of SETHOS: This Work,
which contains excellent Lessons of the most refined Mo-
rality, is full of so id and the most extensive Learning, and
can't fail of being equally instructive and entertaining.
LANCLOUT.

3. **A General Treatise of NAVAL TRADE and COMMERCE**
as founded on the Laws and Statutes of this Realm: In which
those relating to Letters of Marque, Reprisals, and of Resti-
tution, Privateers, Prizes, Convoys, Cruisers, and every other
Branch of Trade Foreign and Domestic, are particularly con-
sidered; likewise the Opinions of the most eminent Council
upon various important Points, relating to Customs and En-
glish Ships, Prizes, and other Articles of Mercantile Business.
In Two Volumes.

4. **Mr. Wood's SURVEY of TRADE; with Considerations
on our Money and Bullion.** The Second Edition.

5. **THE NATIONAL MERCHANT: or, Discourses on Com-
merce and Colonies: being an Essay for regulating and im-
proving the Trade and Plantations of Great Britain.** By

Philosophica Dissertatio de Gravitate. Per R. MATTHEW
Arm.

This Day is Published,

Mathematical Dissertation on a Variety
of Physical and Analytical Subjects. Containing
among other Particulars, A Demonstration of the curve
figure which the Earth or any Planet must acquire from its
Rotation about an Axis. A General Investigation of the
Attraction at the Surface of Bodies nearly Spherical. A De-
monstration of the Meridional Parts, and the Lengths of the
several Degrees of the Meridian, according to the true Figure
of the Earth. An Investigation of the Height of the Waters
in the Ocean. A new Theory of Astronomical Refractions,
with exact Tables deduced therefrom. A new and very exact
Method for approximating the Roots of Equations in Num-
bers, that quintuples the Number of Places at each Opera-
tion. Several new Methods for the Summation of Series.
Some new and very useful Improvements in the Inverse Me-
thod of Fluxions. The Whole in a General and Perspicuous
Manner.

By **THOMAS SIMPSON.**

Printed for T. Woodward, at the Half Moon between the
Two Temple-gates in Fleet street.

Where may be had,

Philosophica Dissertatio de Gravitate. Per R. MATTHEW.
The Second Edition of Barlow's Survey of the Tide

TINCTURA MIRIFICA:

OR,

The Admirable TINCTURE, which infallibly cures the
STONE and GRAVEL, whether in the KIDNEYS,
URETERS, or BLADDER: and also the Strangury,
Stoppage of Urine, and all Heat, Pain and Diffi-
culty in Making Water.

A Few Drops of it momentarily take
off the most excruciating Pains in the REINS or
BLADDER, and certainly prevent their Return; for it
infallibly cures that Dissemper in an extraordinary Manner,
instantly removes all Uneasiness or Difficulty in making
Water, heals all Excoriations, and even Ulcers of the
Urinary Passages, relaxes the Ureters, so that small Stones,
together with Gravel, and all mucous slimy obstructing
Matter may pass freely from the Kidneys, to be voided
visibly with Urine, without Pain, effectually cleanses the
Reins, Ureters, and Bladder from all Impurities, entirely
prevents the Stone in those who are troubled with the
Gravel only; assuredly dissolves all large Stones, possible to be
dissolved; and likewise brings all the Urinary Passages
to their due Tone and Vigour, so as perfectly to
free the Patient from all the terrible Symptoms and mis-
erable Effects of that torturing Disease.

It is the safest Medicine in the World, and not disagre-
able to take; the very first Dose of it absolutely cures the
most dreadful Fit of either Stone or Gravel, in a Minute,
giving such wonderful Relief and perfect Ease, as is indeed
very surprizing; and this great Numbers of Persons of Worth
have experienced, to their infinite Satisfaction.

It is to be had only at Mr. Radford's Toy-shop, at the Red
and Crown against St. Clement's Church-Yard in the Strand
at 3 s. 6 d. a Bottle, with Directions.

To SMELL to, &c.

The Most Noble, Volatile SMELLING-BOTTLE
in the World, lately much improved.

WHICH smelled to, instantly relieves
Persons in the most dismal fainting or swooning FITS,
and in a Moment removes Fluxings, Vapours, Dumbness,
Head-ach, Megrims, &c. It takes off all heavy Sleepi-
ness, retards Swoonings, keeps up the Spirits to a Mi-
racle, and by its Use admits of no Fainting; but invigorates
and enlivens the whole Man, recreates and makes cheerful, al-
tho' never so sad, and in a Moment raises all the sensitive
Faculties.

It is also to be taken inwardly by Drops, which effectually
takes off and eradicates the very Cause; for it potently re-
lieves, comforts, and strengthens the Brain, creates and co-
roborates the Stomach, removes Sickness from it, helps Diges-
tion, cleanses the Blood; and, in a Word, is the greatest Co-
phalic, Stomachick, Hepatick, and powerful Aromatick
possible.

Whereas many Persons of both Sexes perfume their
Handkerchiefs with a few Drops of it, and find that in
using it so, it is of singular Service in all the Cases above-
mentioned; and many Gentlemen, Ladies and Others use it
after this Manner, purely because it gives a most fragrant and
delicious Odour, that constantly both delights and relieves
the Senses, not only better than any thing of a musky Kind,
(which is really hurtful to most Constitutions) but it
really takes off what such Things do occasion; and also
relieves the Head and Brain from any ill Effects of common
Snuff, and instantly diverts from, and prevents the bad Con-
sequences of any sudden, nauseous, offensive Smells; therefore
is extremely necessary for all Gentlemen, Ladies, &c. always
to be carried in their Pockets.

Sold only at Mrs. Markham's Toy-shop, at the Seven Stars
now (since she is removed) directly over-against St. Dunken's
Church in Fleet-street, and at Mr. King's Picture-shop in the
Poultry, at 2 s. 6 d. each.

L O N D O N: Printed for T. COOPER, at the Globe in Pater-Noster-Row.
